# OUR COMPANY

- 100 % German production
- Locations in Thuringia and Bavaria
- Part of a financially strong group of companies
- ISO 9001 and ISO 14001 certifications
- fair wages and working conditions
- Our own modern delivery fleet
- safe and pollutant-free products
- Production capacity of around 30,000 chairs and 10,000 tables per month

# OUR COMPETENCIES

Our strengths lie in the production and customization of high-quality furniture for offices, lounge and waiting areas, as well as theaters and lecture halls. We accompany your project from the design phase through to delivery and installation on site. Even after completion of an order, we, GSM Sella GmbH, are at your disposal with reliable customer service. The 100% in-house production is reflected above all in an excellent price-performance ratio.

# SUSTAINABILITY

## WATER AND WASTE

Water, as a valuable resource, is very important to us. By continuously optimizing our work process, we reduce water consumption and material waste.

We also guarantee the disposal of our customers' internal waste and old stock by certified specialist companies.

## PRODUCTION

The careful use of materials is firmly anchored in the GSM Sella environmental policy and in the awareness of our employees. We observe internally defined environmental criteria in all our manufacturing steps and production processes.

## PACKAGING

Doing without plastics and at the same time protecting all the corners and edges of our products is a particular challenge for our company. We are constantly striving to increase the proportion of recycled and sustainably certified materials and to improve recyclability.

We are constantly revising our guidelines in order to move step by step towards a greener future.

UNO BAR  
Tray 1346 - natural beech -  
chrome-plated frame -  
stacking tray

As a member of the UNO family, the UNO Bar has a modern concept that fits into any sociable outdoor or indoor area. Its 4-legged frame provides the necessary stability and the cross struts offer a comfortable seat as a footrest, even over longer periods of time. The numerous design options for the UNO Bar in terms of upholstery variants, the surface material and the color scheme enable flexible use. Perfect for trade fairs, bars or reception areas, the UNO Bar is the ideal counterpart to your high table or counter.

Color deviations from the original are possible and are not grounds for complaint.  
Flame retardant according to DIN EN 4102 B1; DIN EN 1021-1+2:2014 | 100 % recycled polyester | Weight: 310 g/m<sup>2</sup>

## WARRANTY INFORMATION

### WARRANTY

Our factory warranty is 2 years from the date of delivery. It is limited to parts that are not subject to natural wear and tear. What is not covered by our warranty:

- Impact, tear or similar damage
- Damage due to extreme climatic conditions
- Damage due to environmental influences (acid/wetness etc.)
- Damage due to improper handling or maintenance

If our products are used for more than 8 hours a day, the warranty period will be shortened accordingly.

### WOODEN PARTS

The wooden parts of the chairs are multi-layered and glued without formaldehyde (in accordance with the E1 standard). The processed wood comes from sustainable forestry with the FSC and PEFC seals of approval. Visible wood parts in A-quality. Available in the following versions:

- Standard: natural lacquered beech, DD lacquer (Low in harmful substances according to DIN EN 71 Part 3 - corresponds to the European standard for the safety of children's toys and furniture)
- Water-based lacquer on request (flame retardant according to DIN EN 4102 B1) See price list for surcharge. Color stained and lacquered according to RAL or stain chart: on request for an additional charge.
- If the wooden parts are subject to particular stress, e.g. in schools, hospitals or care areas, we recommend a coating of acrylate lacquer (acrylate lacquer is also flame-retardant in accordance with DIN 4102 B1).

Naturally grown wood varies in color and structure. Natural differences are therefore not grounds for complaint. Color deviations must be expected, especially with subsequent deliveries. When staining wooden parts (solid wood/plywood), the color is absorbed differently by the wood depending on the pore density. The resulting individual coloration underlines the naturalness of the product. Any resulting color softening and color deviations due to the different base wood tones do not constitute grounds for complaint.

### FRAME COLORS

All bases are either powder-coated or chrome-plated. Powder coating: environmentally friendly, electrostatic powder coating with phosphating. High corrosion resistance, impact-resistant (robust against impact and shock), scratch-resistant, UV-resistant, high chemical resistance. Coating thickness approx. 80 µm.

- Standard frame colors (see Standard surface collection, page 97) at the price list base price
- Special frame colors on request

Chrome plating: approx. 25 µm, consisting of semi-gloss nickel and high-gloss nickel, plus chrome with a proportional layer thickness of 0.5 µm - 0.8 µm with the usual manufacturing tolerances

### TABLE TOPS

- STANDARD stock decors: beech, light gray (similar to RAL 7035), birch, oak, cherry, white (similar to RAL 9010)
- SONDER decors: available on request at an extra charge. Surcharges for special table sizes on request

### SUPPLIES

We do not guarantee the processing and quality of third-party fabrics. Minor colour deviations in our fabrics will not be accepted as a complaint for subsequent deliveries.

### CERTIFICATES

- Our company is certified according to:
- DIN EN ISO 9001: 2015 Quality management
  - DIN EN ISO 14001: 2015 Environmental management

### MADE IN GERMANY

All our products are manufactured in Germany, from the frame, coating, seat shells and upholstery through to final assembly.
